with the speed of
open

Getting the most out of your Niagara purchase

niagara

stay at the forefront of innovation

Rapid forward progress is a hallmark of technology that's truly open. By pairing Niagara with a Software Maintenance Agreement (SMA) from Tridium, you have the opportunity to get the latest updates, builds, patches and upgrades at no additional cost—keeping Niagara current and secure, and your business on the cutting edge.

Now, the first of our Niagara Cloud services will be included at no additional cost with your SMA. Keeping your SMA current allows instant access to Backup as a Service (BaaS)—a fail-safe environment for your data. As we build out our Niagara Cloud suite of services, SMAs will begin to feature base options of some of our new offerings, also at no additional cost.

Getting the most out of your Niagara purchase begins with getting the latest advancements as we venture further into the Internet of Things.

Now more than ever, the best opportunity you have to reduce risk and stay current is to pair Niagara with an SMA

a fail-safe environment for your data

Our first Niagara Cloud offering available to users of Niagara 4.3 with an up-to-date Software Maintenance Agreement is Backup as a Service (BaaS), which provides seamless, secure and scalable backups of Niagara to the cloud—24/7/365.

With BaaS, you can reduce downtime, reduce data loss, reduce labor costs and reduce your enterprise's risk.

BaaS key advantages

- Initiate backups with 1GB of online storage; serves 6-12 average-sized backups
- Automated/scheduled and on-demand backups provide you with peace of mind, knowing you can manually initiate or automate them, and have the backups whenever needed
- Add, edit and delete notes to help you remember the context of each backup—what was changed—to restore the most relevant backup
- Secure data encryption in motion and at rest
- Notifications for failure in backups so that no backup failure goes unnoticed
- Geo-located backup service gives you the highest throughput and lowest latency by connecting to the nearest Niagara Cloud server, wherever you are located worldwide
- Soft backup limits so you're never denied an on-demand backup when storage limit is exceeded; backup now and free up space in 30 days
- Niagara Cloud Services are compatible with Niagara 4.3+

For more than 15 years, Tridium has led the world in business application frameworks—advancing truly open environments that harness the power of the Internet of Things.

Our innovations have fundamentally changed the way devices and systems connect to people—and the ways people can control and optimize those machines.

Our products allow diverse monitoring, control and automation systems to communicate and collaborate like never before. From buildings and data centers to manufacturing systems and smart cities, Tridium is changing the rules for automation technology.

We are committed to creating smarter, safer and more efficient enterprises and communities—bringing intelligence and connectivity to the network edge and back.
