Enterprise Software Maintenance Management Tool

Enterprise SMA Management Tool

Overview

Enterprise SMA Management Tool

- **Enterprise SMA management and ordering directly from Niagara Licensing**
- Benefits for channel partners
 - Streamlined process for selling and managing software maintenance
 - Does not require involvement by end-users prior to sales process (Asset Manager account no longer required)
 - Quick-easy import of licenses from project folders or spreadsheet
 - Enables authorized Niagara resellers to manage their portfolio of customers from a single account
 - Quick-easy way to convert a proposal to an order
 - 20% Introductory Discount for proposals with 25 or more licenses - expires December 31, 2022
- Benefits for system owners
 - Sync-up maintenance expiration dates
 - Generous “grace period” upon initial enrollment (up to 364 days/license)

Enterprise SMA

- Requires at least 5 eligible licenses
 - Licenses may be combined from any number of projects or folders
 - Licenses may be imported from other organizations not in the customer's hierarchy
- Applies up to one year grace period for each enrolled license to allow customers to sync-up maintenance expiration dates
- The grace period only applies once per license
- Proposals are sent up through the channel and purchased by Tridium direct partners.
- The customer cannot submit a 0-dollar proposal at any time.

Setting up Entitlements for ESMT

Organization Entitlement

The organization needs to have ESMA Provider Service Access in Niagara Licensing

The screenshot displays the 'Entitlements' section of the Niagara Licensing system. It is divided into three main areas: Portability Access, Brand Access, and Service Access. The 'Portability Access' section shows 'No record available.' The 'Brand Access' section contains a table with one entry for 'Vykon' and an 'ADD ENTITLEMENTS' button. The 'Service Access' section contains a table with two entries, 'ESMA Provider' and 'Marketplace Standard', with the 'ESMA Provider' entry highlighted by a red box.

Brand Name	Brand Status	Expiration	Order (SO/PO)
Vykon	Active	Mar 31,2022	F003178449/-

Service Name	Expiration	Order (SO/PO)
ESMA Provider	Sep 22,2022	F003178448/-
Marketplace Standard	Sep 22,2022	F003178447/-

Tridium direct partners will be given the ESMA Provider Service Access. They will have the ability to give this access to their partners that they want to have this ability.

- **User set up and permissions**

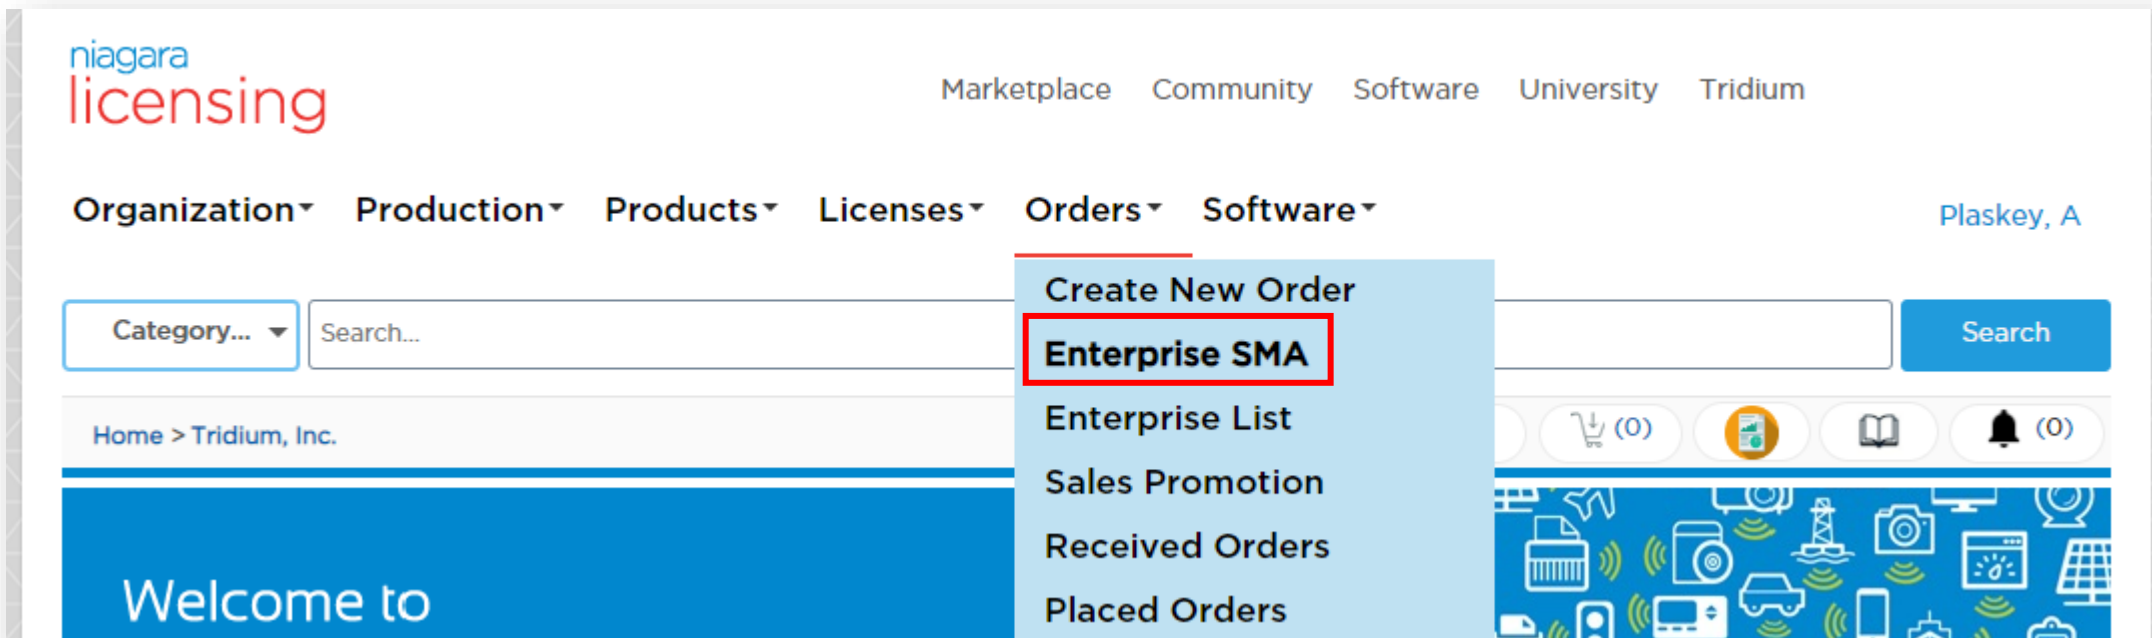

Users need to have access to the license service and require read/readX and Write/WriteX Standard Order-Buy permission:

Access to the Enterprise SMA Tool

To access the ESMA Tool, log into Niagara Licensing.

Then go to Orders → Enterprise SMA

The screenshot displays the Niagara Licensing website interface. At the top left is the logo "niagara licensing". To the right are navigation links: "Marketplace", "Community", "Software", "University", and "Tridium". Below these are dropdown menus for "Organization", "Production", "Products", "Licenses", "Orders", and "Software". The user's name "Plaskey, A" is visible in the top right. A search bar with a "Search" button is located below the navigation. A blue banner at the bottom left says "Welcome to". A dropdown menu is open under "Orders", listing "Create New Order", "Enterprise SMA" (highlighted with a red box), "Enterprise List", "Sales Promotion", "Received Orders", and "Placed Orders".

You will land on the Create Proposal page. To create an ESMA, you need the following:

1. List of Host IDs (minimum of 5 valid licenses)
2. End User Name/Project Name
3. Duration
4. SMA Start Date (within the next 60 days)

Start by clicking Select Hosts.

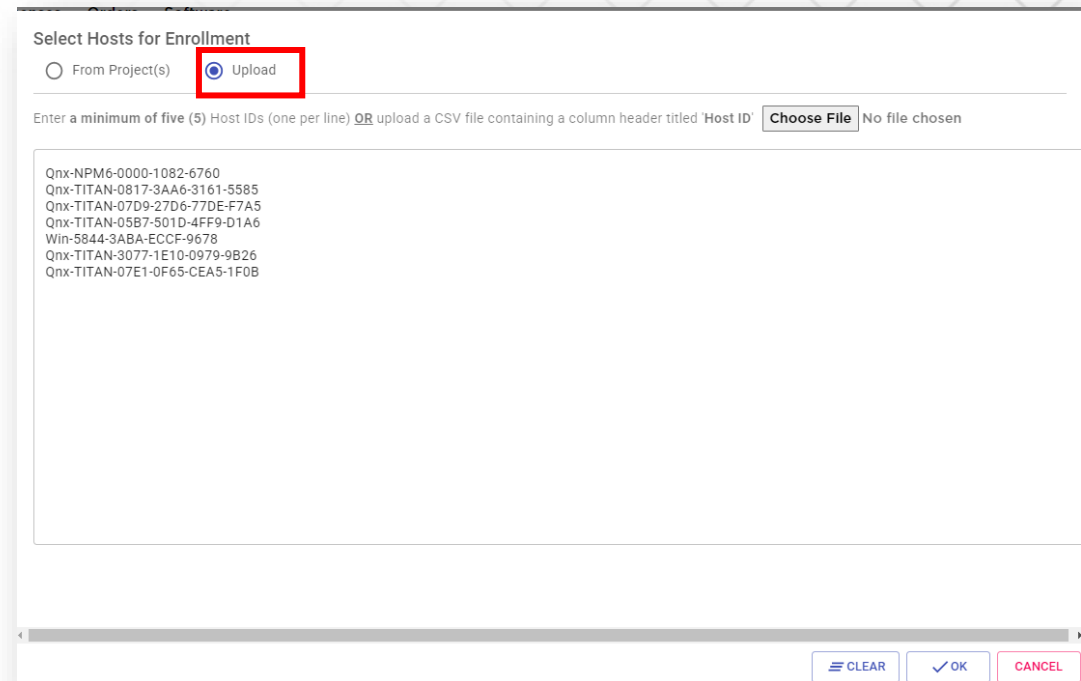

There are 2 ways to add licenses to your proposal:

The screenshot shows the 'Select Hosts for Enrollment' dialog box. At the top, there are two radio buttons: 'From Project(s)' (which is selected and highlighted with a red box) and 'Upload'. Below the radio buttons, the text reads 'Select host(s) from one or more projects or sub-org projects below'. A tree view of project folders is displayed, including '00_sync_test', '00_UAT_SEP_2022', '000 - 3 licenses', '000_ALETTEST_000', '1155 - R & D Testing', '3CEMS Production Workstations', '7941004046/AU0-ECC-821711', 'ABB Marketing Platform', 'AC Test Project', 'Adam's Folder', 'ALE_Auto_Move', 'ALE_Automation', 'Andy Saunders India Projects', 'APPO20121058/ NCI7607240', 'ASHRAE 2008', 'ASHRAE 2009', 'ASHRAE 2010', 'ASHRAE 2011', 'ASIS', and 'AX Migrator'. At the bottom right, there are 'OK' and 'CANCEL' buttons.

From Projects allows you to go through your project folders and your customer's project folders to find the licenses you need.

Please note, you will only be able to find licenses under the account you are logged in under.

The screenshot shows the 'Select Hosts for Enrollment' dialog box. At the top, there are two radio buttons: 'From Project(s)' and 'Upload' (which is selected and highlighted with a red box). Below the radio buttons, the text reads 'Enter a minimum of five (5) Host IDs (one per line) OR upload a CSV file containing a column header titled 'Host ID''. There is a 'Choose File' button and the text 'No file chosen'. A text area contains the following Host IDs: 'Qnx-NPM6-0000-1082-6760', 'Qnx-TITAN-0817-3AA6-3161-5585', 'Qnx-TITAN-07D9-27D6-77DE-F7A5', 'Qnx-TITAN-05B7-501D-4FF9-D1A6', 'Win-5844-3ABA-ECCF-9678', 'Qnx-TITAN-3077-1E10-0979-9B26', and 'Qnx-TITAN-07E1-0F65-CEA5-1F0B'. At the bottom right, there are 'CLEAR', 'OK', and 'CANCEL' buttons.

Upload allows you to copy and paste a list of Host IDs into the field and/or upload a CSV file with the required host ids.

This is the only way to add licenses that are listed under multiple distributors/OEMs.

After clicking OK, the licenses you have selected will populate in the table at the bottom of the page. Please note any errors in the red field.

On the license table, look at the Host Eligible column. There are several reasons why a license is not eligible for the proposal. The most common are:

1. It is an AX Jace license
2. It is a DEMO license
3. The current SMA's expiration date is further in the future than your proposed expiration date.
4. The license is already enrolled in a different ESMA.

Grace Period

Grace Period is SMA coverage that Tridium gives at no charge as part of an enrolled ESMA Proposal.

This is how it is calculated:

Host Code	License Capacity	Current Maintenance End Date	Next Renewal Due On	Suggested SMA Parts	Grace Period
Qnx-TITAN-05B7-501D-4FF9-D1A6	10000	10-Oct-2019	23-Nov-27	[SMA-8200-5YR] [SMA-8200-3YR]	46

Licensing looks at the current SMA expiration date on each license

And it looks at the proposed ESMA expiration date

It then calculates the number of days between those 2 dates. In this example, the tool counted 8 years and 46 days. It recommended a 5YR and 3YR SMA, but anything that remains that is less than a year is covered by Grace.

This can add up very quickly and can be a great selling point for the end user.

Introductory 20% Discount

Proposals with 25 or more licenses are eligible to receive a 20% discount off of their standard multiplier.

This discount is only valid for proposals enrolled (i.e. orders placed) up to December 31, 2022.

The promo code will be listed on the top table below the Total Quantity of licenses.

The customer doesn't have to do anything special to receive this discount, it will be automatically added to the order when the Order Entry team uploads their billing report.

After the purchase is complete, if you look at the License page, you will see a couple of things:

1. The Enterprise line that shows the name of the Proposal.
2. The SMAs that were added to the license. Note the grace period between the INIT expiry date and 3YR start date.

\$0 Proposals

It is possible to create ESMA proposals that do not have any required SMAs to purchase.

However, you CANNOT complete this proposal, as the Place Order button will be greyed out. Your only option is to add an additional license to the proposal that requires an SMA or select a longer ESMA duration.
