new in 2017

JACE 8000 IO R

Introducing a leap forward for the next-generation JACE® 8000. Coming soon, an IO solution that will make the JACE 8000 more powerful, and your migration path straightforward.

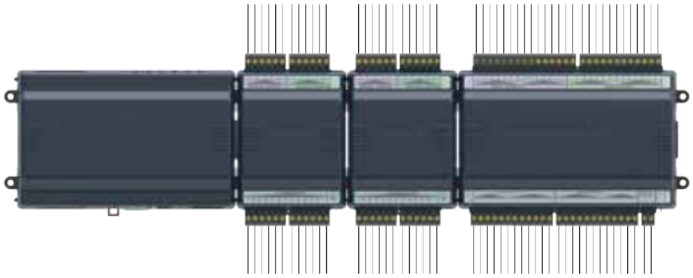

DESIGN SIMPLICITY, TECHNICAL SOPHISTICATION AND MORE, IN BOTH A 16 AND 34 POINT MODULE

- **Ease of use:** Single-tool programming inside the Niagara environment with live debugging
- **Enhanced capability:** Ability to set hold time and default states for outputs based on application needs
- **Improved flexibility:** Operates over an RS485 network and can be installed anywhere. Multiple modules can be combined so each JACE 8000 can command more than 250 points of IO.
- **Minimal wiring labor:** Quick three-step process when moving from NDIO to the JACE 8000

powered by
niagara framework®

MIGRATION MADE EASY

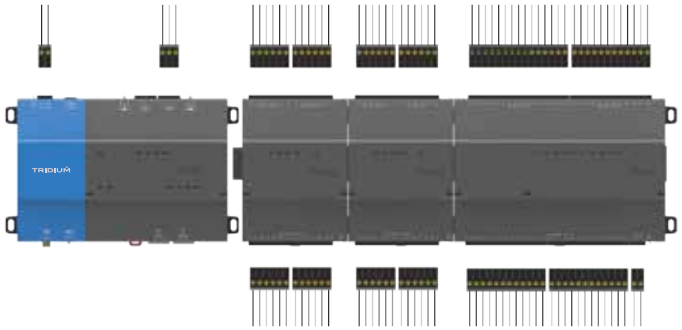

1. Detach from JACE 2, 3E, 6 or 6E's T-IO-16 and T-IO-34 modules

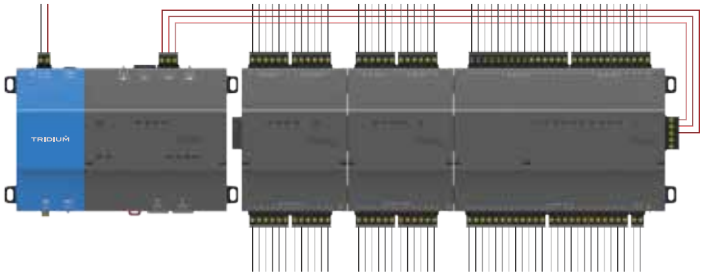

JACE 8000 IO R is a drop-in replacement for legacy T-IO-16 and T-IO-34 modules

2. Reattach to JACE 8000 IO R 16 and 34 modules

Same footprint makes the JACE 8000 IO R an ideal retrofit for JACE 2, 3E, 6 or 6E

3. Add 24VAC/DC and connect the RS485 bus to the JACE 8000

ACT NOW

- **Available incentives:** Tridium programs in 2017* will help you leverage your infrastructure investments as you move from NDIO products to the JACE 8000, with the added bonus of a new low T-IO-16-485 price.

  ** Incentive programs will be available only in regions where NRIO products are sold*

- **Continued support:** JACE 3E and 6E platforms are nearing End of Life (EOL) but will be available for sale through July 1, 2018, with service parts extending through 2021.

- **Opening soon:** Opportunities for participating in Early Access and Beta IO R programs will be available.

Look for more to come on how this latest Niagara Framework® advancement opens a world of possibilities
